Southwest Health District Expands Access to 24/7 COVID-19 and Flu Testing with Additional TestAndGo Kiosks in the District

Albany, GA— The Southwest Health District continues to prioritize community health and accessibility by expanding access to COVID-19 and Flu testing through the introduction of a second TestAndGo Kiosk. In addition to the existing kiosk at the Dougherty County Health Department in Albany, a new kiosk is now available at the Colquitt County Health Department in Moultrie.

The new TestAndGo Kiosk, located at the Colquitt County Health Department at 214 West Central Ave in Moultrie, offers residents convenient round-the-clock access to COVID-19 PCR testing and Flu A&B testing. Like its counterpart in Albany, there are no out-of-pocket costs for tests conducted through the kiosk. For individuals with insurance, billing will be processed through their insurance, ensuring accessibility to testing for all community members.

Pre-registration for testing at both kiosks is not required but is available for those who wish to streamline the process. Individuals can pre-register for testing by visiting <https://register.testandgo.com/>.

For more information about COVID-19 testing and the services provided by the Southwest Health District, please visit www.SWHealthDistrict.org.
